WORK EXPERIENCE

AdvancedGroup.net - Augusta, New Jersey January 2013 - Present
Intern Web Developer and System Administrator

- Developed specialized content management systems using ColdFusion for clients in the financial and insurance sectors that were required to maintain HIPAA and PCI compliance
- Provided Infrastructure as a Service, IaaS, for 8 clients who wished to co-host in our datacenter
- Maintained 5 dedicated Microsoft SQL servers with failover protection to the US East and West Coast
- Maintained webmail servers for over 75 clients
- Maintained DNS and Domain servers in our internal datacenter
- Oversaw the company network and provided first-response to any external network attacks
- Assisted in the beginning of a mass migration of internal systems from our datacenter to Amazon EC2, including 10 servers
- Assembled, maintained, and repaired server hardware part of our internal infrastructure

Kittatinny Regional High School - Newton, New Jersey June 2010 - June 2012
IT Technician

- Implemented a new thin-client computing lab to increase maintenance efficiency
- Improved school web presence by proposing and implementing a new school website
- Maintained computing systems throughout all wings of the building
